

The new automatic verbalisation system

real-time transcription

ADSCRIBE

Cedat 85 has consolidated specific competencies and developed tailored solutions to meet special automatic verbalisation requirements.

Innovative **speech-to-text, natural language understanding and speaker recognition** technologies have all been developed by the Group's own research and development centre.

MAGNETOFONO™ technology is the fruit of research carried out by the **Cedat 85** Group. It has been integrated with specific functionalities, in compliance with specific needs of companies whose policy is **centred around IT security and the confidentiality of managed data**, to create **ADSCRIBE**.

A revolutionary information process system, Adscribe represents a new way forwards in the world of verbalisation.

WHAT IT'S FOR

ADSCRIBE is a technological system developed by the **Cedat 85** Group to maintain maximum confidentiality and produce the punctual, real-time verbalisation of board of director meetings in a multimedially integrated and immediately usable version.

With **ADSCRIBE** contributions by speakers and participants at a board of directors meeting are:

- TRANSFORMED INTO TEXT IN REAL-TIME**
- INDEXED**
- DIRECTLY ARCHIVED IN THE COMPANY'S INTRANET**

therefore full security is ensured, as well as:

- ABSOLUTE IMPARTIALITY**
- SIMPLE SEARCHABILITY**
- MAXIMUM CONFIDENTIALITY**

HOW IT WORKS

ADSCRIBE enables the simple and immediate management of all phases leading up to the drafting of assembly documents.

Not only does it record audio in digital formats, but it also organises it to transform speech into text in real time.

ADSCRIBE produces and automatically sends portions of audio of a set duration to server units, already during the recording process.

The server automatically produces the text, recognises the voice of every speaker, adding the name in the transcript, and publishes it on a dedicated web page.

ADVANTAGES

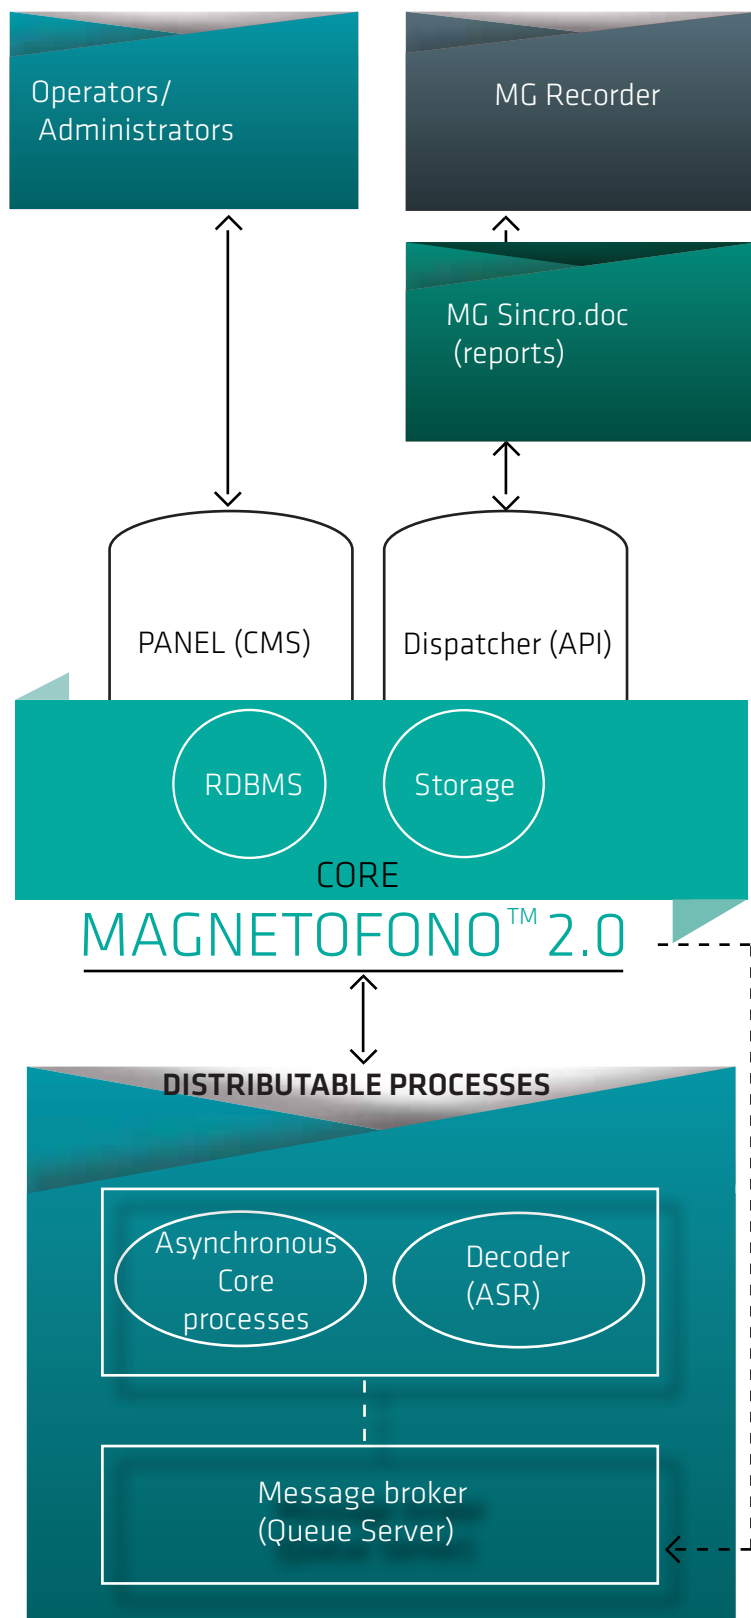

Eliminates the need to produce of hundreds of pages of minutes. Searches for single key words or topics can be performed with just one simple click, through accessing each declaration.

The result is a considerable reduction of management times and costs.

The power of the **ADSCRIBE**, solution comes from the fact that it is directly installed at the client.

It guarantees all the advantages of use of state-of-the-art automatic recognition technology, within closed IT infrastructures, therefore without compromising company security.
